## Balayage

The term comes from the French word "balayer," meaning to sweep. It's a term that refers to the way the colour is applied, not the colour itself. Balayage describes a collective of different colouring techniques that are utilised to achieve lightness and a play of colour to varied degrees of saturation with a seamless appearance. Whether it is French eloquence or Hollywood glamour that you desire, we can make that happen for you.

## Colour Correction

Whether it is removing colour to reduce pigment present in your hair, or filling colour as foundation when transitioning from light to dark. The goal remains the same. To preserve as much hair condition as possible. That may mean that a result can only be achieved over several salon visits to ensure the hair fibre remains intact. That is especially true for dark to light transitions.

Texture services are designed to enhance your ability to style your own hair. Style support can permanently change the structure of your hair through permanent straightening or curl systems. Alternatively, frizz can be eliminated and curl reduced for smooth frizz free hair that gradually dissipates so that your hair can return to natural state. Whether you are looking for a permanent or less permanent style support solution, one of our hair professionals can guide you.
